

Amarrish MS

Associate Engineer – NOC / SOC (L1 Monitoring & Incident Response)

☎ +91-9605174695 ✉ amarrishms732@gmail.com 🌐 LinkedIn 📄 GitHub 📁 Portfolio

Summary

Computer Science graduate with hands-on experience in application monitoring, log-based troubleshooting, incident documentation, and cross-team coordination gained through full-stack development and technical training roles. Strong analytical and communication skills, proven ability to follow structured workflows (SDLC/runbooks), track issues to resolution, and maintain accurate records. Comfortable working in fast-paced, deadline-driven environments and available for 24/7 shift rotation.

Skills

Networking & Systems Fundamentals: TCP/IP, DNS, OSI Model Basics, Windows & Linux (operational level), Client-Server Architecture

Monitoring & Incident Handling: Log Collection & Analysis, Alert Triage, Incident Categorization by Severity/Impact, Escalation Procedures, Root-Cause Troubleshooting, SLA Tracking

Tools & Platforms: Ticketing/Issue-Tracking Systems, Postman (API Testing), Git, GitHub, REST API Debugging

Core Concepts: SDLC, Data Structures & Algorithms, Documentation & Knowledge-Base Creation, Shift-Log Reporting

Soft Skills: Analytical Problem-Solving, Clear Written & Verbal Communication, Cross-Functional Coordination, Ability to Work Under Pressure in 24/7 Environments

Experience

Software Trainer – Imagecon Academy

May 2026 – Present

Tools Used: MERN Stack, Python, React.js, Documentation Tools

- Design and maintain structured training documentation and knowledge-base materials (syllabi, guides, PDFs) for internship programs, mirroring the documentation discipline required for runbooks and knowledge articles.
- Track student progress and assessment feedback against program timelines, maintaining accurate, up-to-date records comparable to shift-log and incident-tracking reporting.
- Identify recurring technical issues faced by trainees during hands-on sessions, categorize them by impact on learning outcomes, and document workarounds for future reference.

MERN Intern – Luminar Technolab

May 2023 – Jan 2024

Tools Used: ReactJS, NodeJS, ExpressJS, MongoDB, Redux

- Monitored application performance and server logs during development cycles to identify bottlenecks, reducing API response time by 30% through diagnostic analysis and query optimization.
- Performed initial assessment and triage of bugs/incidents reported during testing, prioritizing fixes by severity and coordinating with backend engineers to resolve them within sprint timelines.
- Collaborated in an Agile environment, escalating unresolved technical blockers to senior engineers following team workflows, and logged issues and resolutions for traceability.

Full Stack Trainer Assistant – KGISL Micro College

June 2025

Tools Used: MERN, SQL, Python

- Guided 30+ students through debugging and testing fundamentals, reinforcing systematic root-cause analysis and adherence to documented procedures.
- Tracked 8+ end-to-end student projects against milestones, improving on-time completion rate by 40% through structured follow-up and status reporting.

Projects

E-commerce Web Application

ReactJS, NodeJS, ExpressJS, MongoDB

- Built and monitored a full-stack platform with JWT authentication and role-based access; implemented logging to track application errors and user session issues.

Real-Time Chat Application

ReactJS, NodeJS, ExpressJS, MongoDB, Socket.IO

- Developed a real-time messaging system with Socket.IO, including connection-status monitoring and error handling for dropped sessions.

Project Management System

ReactJS, NodeJS, ExpressJS, MongoDB

- Built a tracking system for expenses and resource allocation with secure authentication, functioning similarly to an internal ticketing/status-tracking workflow.

Disease Prediction System (Frontend)

ReactJS, SQL, Python

- Built a React-based dashboard to visualize system-generated predictive alerts from an ML backend.

Certifications

- MERN Stack Certificate – Luminar Technolab (2023):** Completed 2+ projects involving full-stack development, API integration, and application debugging.

Education

B.Tech in Computer Science

APJ Abdul Kalam Technological University, MCET Thrissur, Kerala

Graduated: 2023

CGPA: 7.1 / 10
